

The Physically Fit Dog

Hosted by Wonder Dogs

www.wonderdogsonline.com

Core strengthening? Proprioception? Underwater Treadmill? Doga? Physio-roll? Could your pet dog or canine athlete benefit from a physical fitness program? We include our dogs in numerous and often strenuous activities. From long hikes over varied terrain to performance sports such as agility, fly-ball and lure cursing, many dogs are ill equipped physically to maintain a high degree of performance without injury.

Dr Julia Moore, Certified Rehab Vet will be presenting a working seminar on creating and maintaining a physically fit dog, preventing injuries in performance sports, recognizing when your dog could benefit from a physical fitness or rehab program and even a lesson on how to brush your dogs teeth. Learn about the new advances in physical fitness now available to our canine companions!

When: Saturday, April 28, 2012, 9 - 4

Where: Wonder Dogs, Philomath, OR
